

Cinemizer OLED Authorized Distributor - North America

### Learn to become a skilled 3D video creator.

**Stereographic Applications and Methods (101)** - In this introductory course to 3D video production, you will learn the basics of 3D stereography. Covered topics: An introduction to the 3D camera and image, painting with light, capturing sound, camera operation, and stereographic editing. Learning outcomes include: Basic understanding of the mechanics of stereography, use of 3D equipment for video production, and an understanding of producing a professional 2D or 3D video. Course prerequisite - Personal Profile Questionnaire.

**Stereographic Production from Start to Finish (201)** - In this intensive, hands-on 3D video production workshop, students will apply what they learned in Applications and Methods, plus learn to create a professional 3D video with limited resources and budgets by utilizing the 3 phases of production. Learning outcomes include: Semi-professional quality stereography skills for aesthetics, writing, production, and 3D video editing. The course culminates with each student producing their own 2-minute short 3D stereographic film from start to finish. Course prerequisite: Applications and Methods (101) or instructor approval.

#### October Session Dates

#### November Session Dates

#### December Session Dates

**101** | 1 Full day - Oct. 9, 2012  
**201** | 2 Full days - Oct. 10-11, 2012  
**Location** | Auburn Hills, MI

**101** | 1 Full day - Nov 12, 2012  
**201** | 2 Full days - Nov. 13-14, 2012  
**Location** | Auburn Hills, MI

**101** | 1 Full day - Dec. 11, 2012  
**201** | 2 Full days - Dec. 12 - 13, 2012
